ACCESS RATE CONTROL SYSTEM

The Access Rate Control System (ARCS) is a kit that can be attached to turnstiles or gates to regulate the speed of entry into an area, enhancing safety and security.

BENEFITS

- Controlled entry speeds
- Exit speeds unaffected
- Quick installation
- Cost-effective security
- Low maintenance
- No external power/control circuitry needed

FEATURES

- Fully mechanical
- Ready-to-install kit
- Automatic response to speed rotation
- Weather protected steel housing
- Customizable to various turnstile models
- Permanently lubricated, sealed gearing

APPLICATIONS

- Law enforcement
- Prison access
- Riot/crowd control
- Military/government facilities

PATENT STATUS

- Patent pending
